

## Summary

---

Functional programming enthusiast and avid polyglot. A skilled software developer with a passion for learning and solving real-world problems in innovative ways.

## Employment

---

<b>Software Engineer</b>	<b>Channable</b>	<b>02/2021 - Present</b>
<ul style="list-style-type: none"><li>Refactored infrastructure responsible for importing terabytes of data from external services per day, improving debuggability and observability.</li><li>Designed and implemented AI-assisted categorization using state-of-the-art techniques for mass text classification, improving the existing model performance by 3x.</li><li>Integrated secondary data sources into a high-performance compute pipeline through analysis and application of programming language theory.</li><li>Improved core capabilities by analyzing the expressivity and usability of internal systems, creating well-researched proposals, improving scalability, performance and developer experience.</li></ul>		
<b>Software Engineer</b>	<b>Cargowatch B.V.</b>	<b>02/2018 - 12/2020</b>
<ul style="list-style-type: none"><li>Implemented a specialized web portal for customer support and designed a DSL for invoicing specification.</li><li>Algorithmically improved the existing automatic invoicing process.</li></ul>		

## Education

---

<b>Utrecht, Netherlands</b>	<b>Utrecht University</b>	<b>2018 - 2020</b>
<ul style="list-style-type: none"><li>Master of Science in Computer Science Thesis: Formalized Correctness Proofs of Automatic Differentiation in Coq.</li><li>Coursework: Advanced Functional Programming, Compiler Construction, Program Semantics and Verification, Concepts of Program Design, Optimization and Vectorization.</li></ul>		
<b>Utrecht, Netherlands</b>	<b>Utrecht University</b>	<b>2015 - 2018</b>
<ul style="list-style-type: none"><li>Bachelor of Science in Computer Science</li><li>Coursework: Data Structures, Algorithms, Functional Programming, Discrete Mathematics, Languages and Compilers.</li></ul>		

## Projects

- 
- Helium (2020) Haskell**  
Contributed to the Helium Haskell compiler developed at Utrecht University. Implemented missing Haskell2010 features and improved interoperability between recent experiments and previous work on the compiler.
  - Nedtrain (Nederlandse Spoorwegen) (2018) C#**  
Hybrid planning program combining heuristical algorithmic techniques with an intuitive user interface for creating plans for shunting and scheduling problems.

## Programming Languages and Technologies

- 
- Proficient: Haskell, Python, Nix, Git, SQL
  - Familiar: PHP, Typescript, C#

## Languages

- 
- Dutch: Native or bilingual proficiency
  - English: Native or bilingual proficiency
